

Interfor Western HQ Lumber

Interfor's Western Dimension Lumber is made with fine-grained fiber from the highest-quality forests in North America — with exacting quality and performance standards every time. Our grade options mean you will find the right product for your specific project, beginning with High Quality (HQ), our appearance grade, which meets the demands of the most discerning customer.

INTERFOR WESTERN HQ LUMBER

BEST FOR QUALITY & PERFORMANCE

Interfor has grown to become a world-class producer of some of the finest Western Dimension. To produce our HQ line of product we have secured a stable supply of fine-grained species and milled them to exacting tolerances and proprietary grade standards that guarantee customer satisfaction.

- Wane restricted to pencil wane only (1/2" across corn only on the occasional piece)
- Warp highly minimized
- Splits and end checks are minimized
- No decay or rot

Interfor's HQ is produced from high-quality stands of Spruce/Pine/Fir, Douglas-Fir/ Larch(N) and Inland Hem-Fir(N) from British Columbia's Southern Interior. HQ grades are sorted at our Adams Lake, Castlegar and Grand Forks facilities.

BEST FOR ENVIRONMENT

Wood from responsible sources is by far the best building choice. Our Western Dimension Lumber comes from forests in British Columbia that meet Interfor's high environmental standards.
