

CAMPUS RECRUITMENT

WHAT YOU WILL DO

Our co-op students do hands-on work that builds value for the company and develops their skills and knowledge—each student has a mentor and a defined project.

LOCATION & PROGRAMS

Our students work across the Company—from Georgia to Oregon to British Columbia. We also recruit from a variety of programs—forestry; business; industrial, electrical and mechanical engineering; and wood processing. There's a career for everyone.

OPPORTUNITIES AT INTERFOR

Many of our students return to Interfor for multiple co-op terms and some are offered full-time positions once they graduate. Our goal is to train the next generation of leaders at Interfor.

For more information, visit interfor.com/careers and click on **Campus Recruiting** or email careers@interfor.com.

SAWMILL OPERATIONS TRAINEE PROGRAM

OUR GOAL

Through our Sawmill Operations Trainee Program, we are developing new employees' industry knowledge and technical understanding of sawmilling so they can become tomorrow's sawmill leaders.

WHAT'S INVOLVED

The program includes one year of formal learning through the British Columbia Institute of Technology (BCIT) combined with mentored hands-on learning at one of Interfor's sawmill operations.

WHAT YOU'LL LEARN

Upon completion of the year, selected employees will have earned an Associate Certificate in Wood Processing from an accredited educational institution recognized across North America and have a year of practical experience and mentorship in our sawmill operations.

For more information on the **Sawmill Operations Trainee Program**, email careers@interfor.com.
