INTERFOR ELITE DECKING

BEST CHOICE FOR APPEARANCE

Interfor Elite Decking offers the ultimate in quality appearance, making it the product of choice for architects and builders. Western Red Cedar has beauty, rich color and exceptional building properties, and it is manufactured to exacting standards through our kiln and planer facilities. Properly finished and maintained, Western Red Cedar ages gracefully and lasts for years.

BEST FOR QUALITY & PERFORMANCE

One of the easiest woods to work with, Western Red Cedar is dimensionally stable, lightweight, strong and versatile, and is naturally resistant to decay and insect damage. Interfor Elite Decking is easy to saw and glue, and accepts nails and other fasteners.

Interfor Elite Decking is graded on all sides and knots are sound and tight so the entire product can be used. It is kiln-dried to allow for immediate finishing.

Interfor Elite Decking features straight, even grain and uniform texture. It is made with the highest quality raw materials to meet standards that set it apart from the competition, including:

- All knots are sound and tight.
- The maximum knot size is 2" for 2x4 & 2x6, and 2½" for 2x8.
- No holes and through soft knots are permitted.
- Wane is strictly limited and allowed on the reverse face only.

BEST FOR ENVIRONMENT

Wood from responsible sources is by far the best building choice. Wood grows naturally, it is recyclable and renewable, and its cellular structure captures and stores carbon. Interfor meets the highest environmental standards, and our Western Red Cedar comes from forests in British Columbia that are third-party certified.

Western Red Cedar's natural preservatives protect against decay and insects, so harmful chemical treatment is not needed.

IMPERIAL SIZE <i>nominal inches</i>	IMPERIAL SIZE <i>actual inches</i>	DRESSING	SEASONING	PIECES PER PACKAGE	LENGTH <i>(feet)</i>
2 x 4	1½ x 3½	S4S	KD	182	8-20 PTL
2 x 6	1½ x 5½	S4S	KD	112	8-20 PTL
2 x 8	1½ x 7¼	S4S	KD	84	8-20 PTL

FINISHING AND MAINTENANCE

- Western Red Cedar is pitch and resin-free, making it an excellent base for paints and stains.
- Western Red Cedar should never weather for more than two weeks before finishing. All finishes adhere and perform better when applied to fresh, unweathered wood.
- Power washers are not recommended for use on Western Red Cedar.
- For best results, Western Red Cedar should be coated on all sides before installation. Factory finishing, where available, is preferred.
- Corrosion-resistant nails such as hot-dipped galvanized aluminum and stainless steel are recommended.
- More detailed information about finishing and maintenance is available from the Western Red Cedar Lumber Association website at <https://www.realcedar.com/resources>

INTERFOR ELITE FASCIA & BOARDS

BEST CHOICE FOR APPEARANCE

Interfor Elite Fascia and Boards offer the ultimate in quality appearance, and are the first choice for builders. They are manufactured to exacting standards through our kiln and planer facilities.

Western Red Cedar delivers beauty, rich color and exceptional building properties. Properly finished and maintained, it ages gracefully and lasts for years.

BEST FOR QUALITY & PERFORMANCE

One of the easiest woods to work with, Western Red Cedar is dimensionally stable, lightweight, strong and versatile, and is naturally resistant to decay and insect damage. Interfor Elite Fascia and Boards are easy to saw and glue, and accept nails and other fasteners.

The cellular structure and insulation value of Western Red Cedar means that buildings featuring Cedar paneling, ceilings or siding are cooler in the summer and warmer in the winter. The wood also suppresses and absorbs sound.

Interfor Elite Fascia and Boards can be used for trim, board

and batten siding, or for garden structures. They feature straight, even grain and uniform texture and select tight knots, meeting standards that set them apart from the competition, including:

- The wane on S1S2E boards is strictly limited to the reverse face only.
- The face is furnished with an attractive resawn finish.

BEST FOR ENVIRONMENT

Wood from responsible sources is by far the best building choice. Wood grows naturally, it is recyclable and renewable, and its cellular structure captures and stores carbon. Interfor meets the highest environmental standards, and our Western Red Cedar comes from forests in British Columbia that are third-party certified.

Western Red Cedar's natural preservatives protect against decay and insects so harmful chemical treatment is not needed.

INTERFOR ELITE V-JOINT PANELING

BEST CHOICE FOR APPEARANCE

Western Red Cedar offers beauty, rich color and exceptional building properties, and it is manufactured to exacting standards through our kiln and planer facilities. Properly finished and maintained, Western Red Cedar ages gracefully and lasts for years.

Interfor Elite V-Joint Paneling features straight, even grain; uniform texture; and sound, tight knots that will not fall out over time. It is reversible — smooth on one face and saw-textured on the other — and can be installed with either side exposed. The sawn face adds an appealing texture to the finished project. The product is available in both a V4E and V2E pattern.

BEST FOR QUALITY & PERFORMANCE

One of the easiest woods to work, Western Red Cedar is dimensionally stable, lightweight, strong and versatile, and is naturally resistant to decay and insect damage. Interfor Elite V-Joint Paneling is easy to saw and glue, and accepts nails and other fasteners.

IMPERIAL SIZE <i>nominal inches</i>	IMPERIAL SIZE <i>actual inches</i>	DRESSING	SEASONING	PIECES PER BUNDLE	PIECES PER PACKAGE	LENGTH <i>(feet)</i>
